Goal

To tell the ages of stars and planets

Goal

To tell the ages of stars and planets

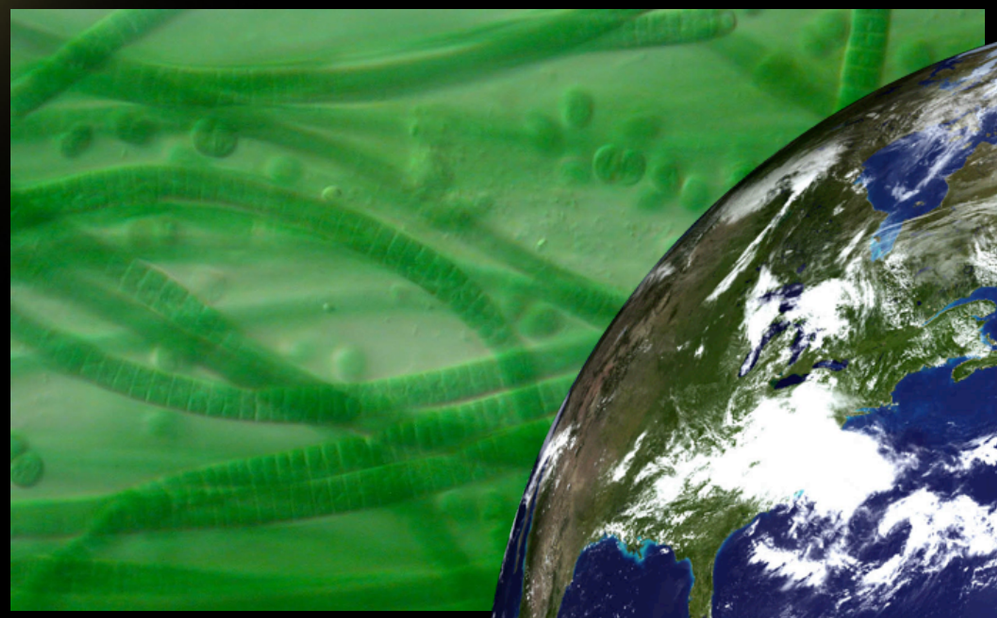
1 billion years old

1 billion years old

3 billion years old

1 billion years old

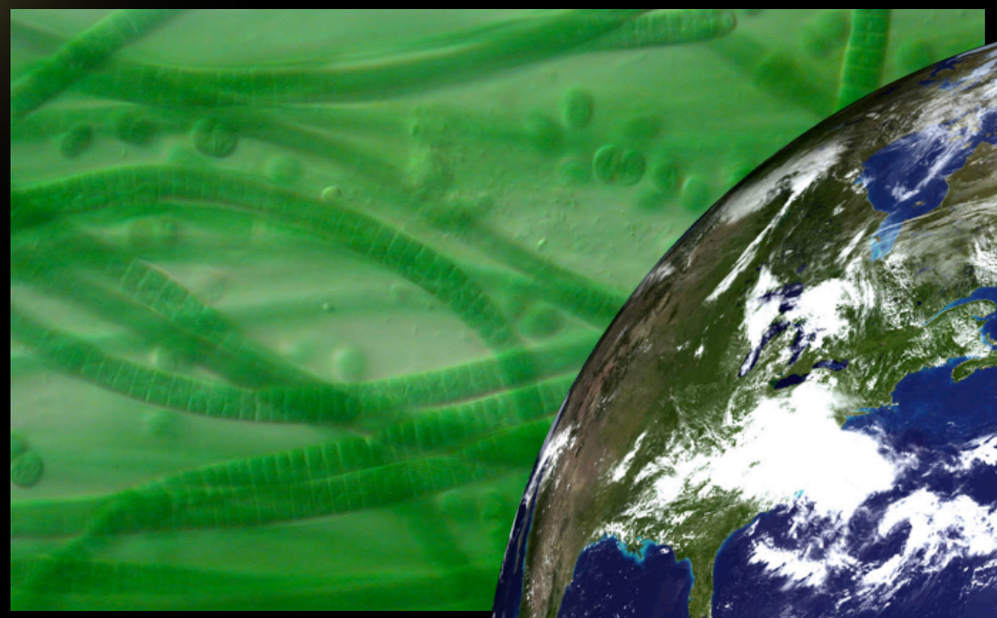
3 billion years old



4.6 billion years old

1 billion years old

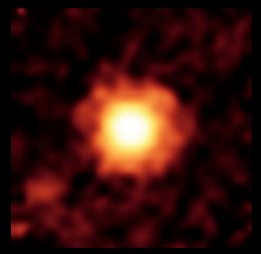
3 billion years old



4.6 billion years old

10 billion years old ?

Newborn



100 million years old

1 billion years old

3 billion years old

5 billion years old

10 billion years old

> 10 billion years old

Newborn | 100 million years old | 1 billion years old | 3 billion years old | 5 billion years old | 10 billion years old | > 10 billion years old

Imagine if ...

Newborn | 1 year | 20 years | 40 years | 60 years | 80 years | Appear old

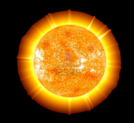
Solution

Use a star’s slowing spin rate as a clock...

Solution

Use a star’s slowing spin rate as a clock...

The Sun:
4.6 billion years,
Spin period = 27 days



The Sun:
4.6 billion years,
Spin period = 27 days
